FURBALL

THE FLOFFIEST FELINE ON BASE

Furball is a charming feline with a smile so radiant that it brightens the gloomiest of days. His fur is so soft and fluffy, it has a life of its own, escaping his body in delightful tufts that float gently to the ground.

Wherever **Furball** goes, he leaves behind piles of fluffy fur. When he sits on a sofa, it turns into a furry paradise, covered in layers of his fluff. As time goes on, he continues to spread happiness and love, capturing the hearts of the meme coin community as a sensation among investors trading furballs tokens as a symbol of prosperity and good fortune.

1. What makes Furball different from other meme coins?

✓ The project features a hyper-deflationary burn mechanism, with **99.90%** of the total supply (**20.979 trillion tokens**) allocated for future burns. The price increase factor is projected to be **1000X**—this translates to a potential **100,000%** increase in the token price.

2. How will the token price be stable and grow over time?

✓ Unlike many meme projects with weak liquidity, **Furball** is allocating **\$2M** to the liquidity pool. This ensures price stability at launch and long-term sustainability. Additionally, our controlled token burns will increase scarcity, making each **Furball** token more valuable over time.

3. What is the presale price, and how much can I expect in returns?

✓ The presale price is **\$0.0004 USD** per token. Upon launch, the token price is projected to be **\$0.0008 USD** based on liquidity allocation, meaning early investors could see an instant **2X** potential. With growing demand and token burns, prices could increase further post-launch.

4. Will there be marketing efforts to drive demand?

✓ Yes! **Furball** has a massive marketing budget of **\$270K** dedicated to viral campaigns, top-tier influencer partnerships, and **CEX** listings.

5. How does the burn mechanism work, and why is it important?

✓ A total of **20.979T** tokens are set aside for controlled burns over time. This reduces the total supply, increasing scarcity and driving up the token's value in the long run. Unlike instant burns that don't impact price, our strategic burns ensure a sustained price increase over time.

6. How can I buy Furball tokens during the presale?

✓ The Presale is exclusively hosted on our official website: www.furball.fun. You can purchase with **ETH** on **BASE** network in just a few clicks, connecting your **Metamask Wallet** and interacting with our **Web3 Payment Widget Powered by SupemeCode**.

7. What happens after the presale ends?

✓ After the presale, **Furball** will go live on Uniswap with a **\$2M liquidity pool**. The **Claim button** will be enabled, allowing investors to **Claim** their tokens and either swap or hold them in their wallets for potential future gains.

You'll need to **Claim** your tokens once the presale ends and after liquidity is added to Uniswap! This ensures a fair and secure distribution for all investors. **Claiming tokens** will be simple, just connect your **Metamask Wallet** and retrieve your tokens when the **Claim** period opens.
